## EDUCATION

### Arizona State University

M.S., Artificial Intelligence

B.S., Computer Science

GPA: 3.76

Tempe, AZ

Aug 2023 - May 2025

Aug 2020 - May 2024

Skills Learned: Database Management, Machine Learning, Distributed Software, Data Structures & Algorithms

## EXPERIENCE

### Software Engineer Intern, R&D @ Edwards Lifesciences

Irvine, CA | May 2024 - Aug 2024

- Utilized the **C# .NET** ecosystem to develop the software inside **HemoSphere**: a hemodynamic patient monitoring system used in more than 5000 hospitals around the world
- Employed **C#**, **WPF**, and **gRPC** to implement the GUI and algorithm integration of a new feature: the detection of **sAS (Severe Aortic Stenosis)** in patients
- Leveraged **Git** and **Azure DevOps** for streamlined project management in an agile scrum environment. Consistently deployed release candidate builds for Systems and Validation teams to test
- Crafted a **Python** script employing **natural language processing** to programmatically add trace relations for over 5000 SRD, SRS, and SDD documents in **PTC Integrity**, a software that records system and software requirements ensuring traceability and compliance (used by the FDA to review new releases). This project saved 70+ hours of manual labor.

### Computer Science Instructor @ iCode Chandler

Chandler, AZ | Aug 2023 - Mar 2024

- Taught children of ages 6-14 introductory coding fundamentals with block-based languages such as Scratch & Vex Go, web development with **HTML/CSS/JavaScript**, and **Data Structures & Algorithms** with **Python**

### Software Engineer Intern @ IQM Corporation

Remote | May 2022 - Aug 2022

- Crafted modern, performant, reliable code in **TypeScript**, **React.js**, **Redux**, **SASS** for the firm's flagship project: a suite of ad-campaign management web applications
- Collaborated in an agile scrum environment leveraging **Git**, **BitBucket**, **Jira**, and **Jenkins** for streamlined project management and version control
- Implemented critical UX features and bug fixes, resulting in significant improvements to clients' user experience
- Developed a complete overhaul of the main lead generation website ([iqm.com](https://iqm.com)) with **Remix.js** and **Bootstrap**

## PROJECTS

(See more at <https://vyas.app/projects>)

### Twitch Chat Analyzer (HackSC Hackathon Project) (<https://vyas.app/projects/twitch-chat-analyzer>)

- A chrome extension that analyzes the chat of a Twitch live stream and displays the percentage positivity of the chat, helpful for Twitch moderators when managing a stream
- The **JavaScript** client sends the chat stream to the **Python (Flask)** backend in real time using **Socket.io**
- The backend analyzes the stream and performs natural language processing using **NLTK**
- The computed percent positivity of the chat is reported back to the client, displayed by the Chrome extension

### PhotoShare (<https://vyas.app/projects/photoshare>)

- A full-stack photo-sharing web app where users can create albums, upload photos, add tags, likes, and comments
- As team lead, I managed the project's development with **Jira**, **Git**, and **GitHub** ensuring all four team members learned and followed the best practices of how to collaborate using these tools
- Frontend designed using **Figma** and built with **React.js**, **React Router**, and custom **CSS**. Backend API was built with **Flask** and **PostgreSQL**, with authentication done using **JSON Web Tokens**. User photos are stored using **AWS S3**.

## SKILLS

### Languages

JavaScript, TypeScript, Python, C#, C++, Java, C, HTML/CSS, SQL

### Libraries/Frameworks

Node.js, React.js, Next.js, Express.js, Flask, D3.js, Jest, Cypress

### Tools/Platforms

Git, GitHub, BitBucket, Jira, Azure DevOps, Microsoft Office

### Databases

MongoDB, PostgreSQL

### Operating Systems

Unix/Linux
